

How to install our secure QR code mobile application

Step 1: Download the app by scanning one of our QR codes that we generated or by going directly to the download link.

Step 2: Press on the download option in the page.

Step 3: After your phone installs the apk file, install it by finding the file in your phone's download folder.

Step 4: Install the application and create an account

Step 5: Sign in with the account you just created and start scanning from there.
